#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 6 is rejected under 35 U.S.C. 102(b) as being anticipated by Quick (WO 85/00268)
 OR Ruback et al (4008557)
 OR Makeham et al (3596447).

Quick or Ruback or Makeham disclose:

Cutting & shredding & creating a stream of air means (Makeham: col. 2, In. 13, 29, col. 1, In 53-62; ref. 14, 18, 20, 38, 40, 42; Quick: discloses the shredding/thrashing pg. 7, In 21-22, cutters 84, 86, 122, 124, discharger/feeder 100, 106; Ruback: shredding/thrashing col. 3, In 28, ref 102, 104, 74, discharging/delivering outside col. 4, In 30-35).

The finger of ref 25 of Makeham is also capable of acting as a blade & shredding; it is noted however that Makeham does not show that it is projecting outwardly from the periphery of the disk, but claim 6 does not require this structural feature, and between elements 30 air is generated as claimed; both Quick & Ruback disclose a mechanism for both cutting & shredding; wherein the apertures enclosed by ref 86 (Ruback) and ref 106 (Quick) provide for generating air for aiding sideways discharge as claimed.

Application/Control Number: 10/637,143 Page 3

Art Unit: 3671

As applied to claim(s) 6, in view of the structure disclosed/taught by Quick (WO 85/00268) **OR** Ruback et al (4008557) **OR** Makeham et al (3596447), the method of operating/using the device is inherent since it is the normal and logical manner in which the device is used.

3. Claims 1-3 rejected under 35 U.S.C. 102(b) as being anticipated by Quick (WO 85/00268) **OR** Ruback et al (4008557).

Quick or Ruback disclose:

In re claim 1:

At least two topper/shredder disks & blades on a center support axis (Quick: ref 84, 86, 122, 124; Ruback: 102, 104) [also, in re cl. 2];

Air assist vane (Ruback: ref 116, 118, 119, col. 3, ln 47; Quick: ref, 136, 138, 139, pg. 8, ln 5-8[also, in re cl. 3].

Quick & Ruback disclose a mechanism for both cutting & shredding; wherein the apertures enclosed by ref 86 (Ruback) and ref 106 (Quick) provide for generating air for aiding sideways discharge as claimed.

Allowable Subject Matter

Art Unit: 3671

4. Claims 4-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### **Response to Arguments**

Applicant's arguments filed 8/10/2004 have been fully considered but they are not persuasive.

As the Examiner pointed during the interview on 8/27/2004, claim 6, does not set forth any structural elements which would distinguish over the prior art.

Although the Applicant argues that the cited references do not disclose structure for shredding, however as the Applicant explained, shredding can be done by the mere fact of having more than one cutting element. The Examiner further notes that claim 6 does not even require a plurality of cutting elements, or any other structure for performing the method claimed; on the other hand, shredding can be accomplished by, for example, elements ref 86 (Ruback, '557). The air is created, entrained by simply, for example, through the hole created by element ref 86, fig 2 of Ruback. Similarly in re Quick, as noted in the Interview Summary.

Application/Control Number: 10/637,143 Page 5

Art Unit: 3671

#### Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Árpád Fábián Kovács whose telephone number is 703-308-5897. The examiner can normally be reached on Mo-Th.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas B. Will can be reached on 703 308 3870. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Application/Control Number: 10/637,143
